Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-14 are presented for examination.
2. The abstract of the disclosure is objected to because the abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text. Correction is required. See MPEP § 608.01(b).
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

or

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-14 are rejected under 35 U.S.C. § 102(a) and 102(e) as being anticipated by Riordan et al. (Riordan) Pub. No. 2003/0100297.

5. As to claim 1, Riordan teaches the invention as claimed, including a computer-implemented method for downloading a radio configuration (R-CFG) file onto a software defined radio (SDR) device from a server comprising:

forming a secure connection between the SDR device and the server (pages 1-2, paragraphs [0014 - 0017]);

sending a message that requests the R-CFG to be downloaded over the network from the server to the SDR device (pages 2-3, paragraphs [0020, 0024, 0026, 0028]);

downloading the R-CFG from the server to the SDR (pages 2-3, paragraphs [0020, 0024, 0026, 0028]); and

using a device manager on the SDR device to determine whether the R-CFG is compatible with the SDR device (page 3, paragraphs [0028 - 0030]).

6. As to claim 2, Riordan teaches the R-CFG is compatible with the SDR device provided that the R-CFG controls at least one radio frequency parameter solely within a

Art Unit: 2141

permitted level established by a regulatory agency (page 1, paragraphs [0011 - 0013]).

7. As to claim 3, Riordan teaches the R-CFG is compatible with the SDR device provided that the R-CFG is configured to execute on a particular type of SDR device (pages 2-3, paragraphs [0020, 0024, 0026, 0028]).

8. As to claims 4-5, Riordan teaches a jurisdiction identifier is transmitted with the message. wherein the jurisdiction identifier can be modified by a user of the SDR device (page 1, paragraph [0005]).

9. Claims 6-14 have similar limitations as claims 1-5; therefore, they are rejected under the same rationale.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Le H. Luu whose telephone number is 571-272-3884. The examiner can normally be reached on 7:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
